PRECISION ONCOLOGY CLINICAL ACTION & PROTOCOL RECOMMENDATION

Recommended Therapeutic Pathway:

First-line 3rd-generation EGFR TKI (Osimertinib) evaluation, brain MRI surveillance, and liquid biopsy monitoring for T790M.

Genomic Biomarker Summary: Identified somatic hotspot mutations in EGFR (p.L858R), KRAS (p.G12C). Confirmed pathological classification across ClinVar and COSMIC registries with extreme somatic rarity in gnomAD exomes.
